

Self Neglect Issues in Elderly

Self Neglect— “A condition that is the result of an eligible adult’s inability, due to physical or mental impairments, or both, or a diminished capacity, to perform essential self-care tasks that substantially threaten his or her own health...and general safety” [Elder Abuse & Neglect Act Chapter 320, Aging, (320 ILCS 20/)].

Signs of Self Neglect:

- Dehydration. Malnutrition. Bedsores.
- Unexpected/unexplained deterioration of health.
- Excessive dirt or odor.
- Hazardous, unsafe or unclean living conditions.
- Absence of needed eyeglasses, hearing aids, dentures, prostheses.
- Inadequate or inappropriate clothing for weather.
- Inadequate heating or cooling in inclement weather.

Characteristics of Self Neglect:

- Individual lives alone
- More likely to suffer from mental illness or physical illnesses
- Decreased physical abilities
- Alcohol or drug problems
- Mostly women
